PROFILE

Full Stack Software Engineer with **2 years** of professional experience building and maintaining scalable, high-quality web applications in collaborative, Agile environments. Strong background in frontend development with Angular and TypeScript, complemented by solid backend experience in Java and Spring Boot. Passionate about clean code, maintainability, CI/CD automation, and delivering reliable user-facing features at scale.

SKILLS

Languages : Java (8–21), TypeScript, JavaScript (ES6+), C++, C#, Python

Frontend : Angular (16–19), HTML5, CSS3, Bootstrap, WCAG Accessibility

Backend : Java, Spring Boot, Node.js, REST APIs

DevOps & CI/CD : GitHub Actions, GitLab CI/CD, Docker, Dynatrace

Cloud : AWS (fundamentals), Microsoft Azure (fundamentals)

Databases : MySQL, PostgreSQL

Testing & Quality : Postman, Swagger, SoapUI, Jasmine, Karma, Cypress

Tools : Jira, Confluence, Git, IntelliJ, Eclipse, VS code, Visual studio

Methodologies : Agile / Scrum, Collaborative development

AI : Azure AI foundry, RAG architecture, Azure OpenAI

WORK EXPERIENCE

Fullstack Developer

Desjardins - Canada

03/2025 - now

Contributed to the development and improvement of AccèsD, Desjardins' online banking platform used by millions of members.

- Contribute to the development and continuous improvement of AccèsD, one of Canada's most widely used online banking platforms, serving millions of users.
- Design and implement frontend features using Angular 19 and TypeScript, focusing on usability, WCAG digital accessibility standards, and performance.
- Develop secure and scalable REST APIs using Java and Spring Boot.
- Collaborate closely with UX designers, product owners, QA engineers, and developers in an Agile/Scrum environment.
- Write unit and integration tests to ensure code reliability and long-term maintainability.
- Participate in CI/CD improvements, including the migration of pipelines from Concourse to GitHub Actions.
- Optimize application performance and security to meet the strict requirements of the financial sector.

Fullstack Developer

Orange Business - France

03/2023 - 02/2024

Contributed to the development of ClickRH, an internal HR platform used across Orange Group.

- Modernized a legacy Java / Struts application by migrating it to Angular and TypeScript.
- Improved frontend architecture and UI consistency while ensuring compliance with WCAG accessibility standards.
- Implemented continuous integration pipelines to streamline deployments and improve development efficiency.
- Performed software maintenance and bug fixing to ensure system stability and performance.

Software Developer

Matrox - Canada

05/2022 - 08/2022

Contributed to the development video processing software (MPEG, XDCAM, PRORES).

- Implemented technical solutions to meet specifications using object-oriented programming in Java and C++ for back-end development.
- Developed and executed software tests to ensure proper functionality and detect regressions.
- Added new features based on client requests and evolving requirements.
- Authored technical documentation to help users maximize the software's potential and ensure maintainability.

ADDITIONAL EXPERIENCE

Independent Full Stack Developer - Canada

03/2024 - 11/2024

- Continuously updated skills through training, workshops, and self-study to stay current with industry trends and emerging technologies.
- Worked closely with clients to gather requirements and translate them into technical specifications for implementation.
- Developed software for desktop and mobile operating systems.

EDUCATION

Master degree in Computer Science And Network Engineering (05/2024)

Ecole Polytechnique De Nancy - France

LANGUAGES

French : Native Language

English : Advanced (C1)
